

SAND PLACEMENT PERMIT-BARRIER ISLAND

1-5 - Barrier island sand. 1-5 - Barrier island sand.

Approved material. Approved materials are those constructions and landscaping materials whose mineralogical composition is white fine to medium grained quartz sand. However, oyster shell, limestone or white dolomite may be used for roadbed or foundation construction if reasonably the same color as approved sand after exposure to the sun and not containing clay or other discoloring, staining or darkening material.

LDC Article 3 Land Disturbance Activities Sand and aggregate on barrier islands. A sand and aggregate use permit is required prior to placement on Santa Rosa Island or Perdido Key of any sand, aggregate, or other construction or landscaping materials regulated by the LDC, regardless of any other land disturbance permits issued or other approvals granted through the LDC compliance review. The process to authorize the placement of these regulated materials is established in the design standards manual, chapter 2 (DSM) **to prevent the importation, use, and relocation of red clay and other prohibited materials that tend to discolor, darken, or stain the natural white sands of those barrier islands.**

Construction of infrastructure or addition of impervious area is not covered under this permit.
